

Listing of Claims:

1. (Currently Amended) An image and audio reproducing apparatus comprising:

a display device;

a storage device which stores a picked-up image data, audio
5 data which is generated before and at a pick-up timing of the image data, and time data indicating the pick-up timing;

an audio reproducing device which reproduces the audio data;

an image reproducing device which reproduces the image data to display an image on the display device; and

10 a controller which controls the image reproducing device so that a display size of the image gradually changes until the audio reproducing device reproduces the audio data generated at the pick-up timing based on the time data to inform the pick-up timing.

2. (Currently Amended) The image and audio reproducing apparatus according to claim 1, wherein the controller controls the image reproducing device ~~to display the image data when~~ so that the display size changes gradually at a constant ratio in a
5 predetermined changing manner until the audio reproducing device reproduces the audio data ~~which is~~ generated at the pick-up timing ~~is reproduced~~.

3. (Currently Amended) The image and audio reproducing apparatus according to claim ~~2~~ 1, wherein the controller controls the image reproducing device ~~to display a relationship between a timing when the reproduced~~ so that the display size enlarges
5 gradually until the audio reproducing device reproduces the audio data ~~is generated and at~~ the pick-up timing ~~on the display device.~~

4. (Currently Amended) The image and audio reproducing apparatus according to claim 1, wherein the controller controls the image reproducing device ~~to display a relationship between a timing when the reproduced~~ so that the display size reduces
5 gradually until the audio reproducing device reproduces the audio data ~~is generated and at~~ the pick-up timing ~~on the display device.~~

Claims 5-9 (Canceled).

10. (Currently Amended) The image and audio reproducing apparatus according to claim ~~2~~ 1, wherein the storage device further stores audio data which is generated after the pick-up timing, and the controller controls the audio reproducing device
5 to reproduce the audio data generated after the pick-up timing,

after ~~a time when~~ the audio data which is generated at the pick-up timing is reproduced.

11. (Currently Amended) The image and audio reproducing apparatus according to claim ~~8~~ 1, wherein the storage device further stores audio data which is generated after the pick-up timing, and the controller controls the audio reproducing device
5 ~~to reproduce the audio data after a time when~~ so that the display size of the image one of enlarges and reduces gradually until the audio reproducing device reproduces the audio data ~~which is~~ generated at the pick-up timing ~~is reproduced~~, and ~~to gradually change the image displayed on the display device after a time~~
10 ~~when~~ the other of reduces and enlarges gradually after the audio reproducing device reproduces the audio data ~~which is~~ generated at the pick-up timing ~~is reproduced~~.

12. (Original) The image and audio reproducing apparatus according to claim 1, further comprising:

a selector which selectively disables the controller, and wherein the controller controls the image reproducing device to
5 display information indicating the pick-up timing on the display device when the selector does not disable the controller.

13. (Currently Amended) The image and audio reproducing apparatus according to claim 1, wherein the storage device stores plural sets of audio data and image data which are associated with each other, and the apparatus further comprises:

5 a first selector which selects one of the plural sets of audio data and image data stored in the storage device, and wherein the audio reproducing device reproduces the audio data of the selected set of audio data and image data ~~by the selector,~~ and the image reproducing device reproduces the image data of the
10 selected set of audio data and image data ~~by the selector.~~

14. (Currently Amended) The image and audio reproducing apparatus according to claim 13, further comprising:

5 a determining unit which determines whether the storage device stores audio data which is generated before and at the pick-up timing, and wherein the controller controls the image reproducing device to display information indicating the pick-up timing on the display device when the determining unit determines that the storage device stores the audio data which is generated before and at the pick-up timing.

15. (Original) The image and audio reproducing apparatus according to claim 13, wherein the controller comprises a second selector which selects a set of audio data which is generated

before and at the pick-up timing and image data and presents the
5 selected set as a selection candidate for the first selector.

16. (Currently Amended) The image and audio reproducing
apparatus according to claim 1, wherein the image and audio
reproducing apparatus comprises a digital camera comprising:

a pick-up device which ~~picks up an image to output~~ produces
5 the pick-up image data; and

a recorder which ~~records an audio sounds to output~~ produces
the audio data.

17. (Currently Amended) ~~An article of manufacture~~
~~comprising a~~ A computer-readable ~~computer usable~~ medium having
stored thereon a computer readable program for controlling a
computer to perform functions ~~code means embodied therein, the~~
5 ~~computer readable program code means~~ comprising:

~~computer readable program code means for causing a computer~~
~~to read a~~ reading ~~picked-up image data, audio data which is~~
generated before and at a pick-up timing of the image data, and
time data indicating the pick-up timing from a storage means;

10 ~~computer readable program code means for causing a computer~~
~~to reproduce~~ reproducing the audio data;

~~computer readable program code means for causing a computer to reproduce~~ reproducing the image data to display an image on a display device; and

15 controlling the reproducing of the image data so that a display size of the image gradually changes until audio data generated at the pick-up timing is reproduced ~~computer readable program code means for causing a computer to control the image data reproducing program code means based on the time data to~~
20 ~~inform the pick-up timing.~~

Claims 18-21 (Canceled).

22. (Currently Amended) An image and audio reproducing method comprising ~~the steps of:~~

reading ~~a~~ picked-up image data, audio data which is generated before and at a pick-up timing of the image data, and
5 time data indicating the pick-up timing from a storage means;

reproducing the audio data;

reproducing the image data to display an image on a display device; and

controlling the reproducing of the image data so that a display size of the image gradually changes until audio data generated at the pick-up timing is reproduced ~~reproducing step based on the time data to inform the pick-up timing.~~
10
